Linux, C, Git, CSS, Figma, Java, HTML5, Javascript, Typescript, React, Human Centered Design, Ruby

WEB DESIGN EXPERIENCE

Landlord-Tenant Communication Tool — JusticeTech

August 2025 — December 2025

- Visualized application flow as a Figma prototype to guide development
- Collaborated with legal clients to ensure the app was useful for tenants
- Advocated for accessibility and Human Centered interaction practices during development
- Implemented several usability and design features and fixes
- Developed a finished React application with a team of 7

Colony Cats Website Redesign

January 2025 — May 2025

- Organized a team of 5 people in improving the website of a Columbus business
- Created usable Figma prototypes to display functionality
- Presented work regularly for criticism and feedback on design
- Delegated tasks within the group to stay on track with deadlines

Computer Science TA — Ohio State University

January 2022 — January 2024

- Mentored students throughout their introductory software courses
- Described concepts of Java and data structures to students both inclass and during office hours
- Coordinated grading with other TAs for consistency and timeliness
- Courses: CSE2221, CSE2231, CSE2421

Software Intern — Abre Inc.

January 2021 — May 2021

- Optimized database organization for internal uses
- Created test pages and data for client demos
- Learned software development practices in a startup environment
- Succeeded with working in a fast moving, agile company
